Anchizuzu · bass trap chop stencil (7.6 in.)

Print at 100% scale (Actual Size, never Fit to Page) on cardstock or Reynolds Freezer Paper.

- Option 1 — Cleanest chop (no bridges): Cut along all solid black lines, including the small triangle in the middle of the character. Lay the outer sheet on the bag, stick the white character mask inside the circle with two rolled loops of painter's tape (or iron freezer paper shiny-side-down onto the cotton for 10 seconds), mist two light coats of Rust-Oleum Satin Apple Red, and peel.
- Option 2 — One-piece cardstock stencil: Leave the three dashed red tabs uncut so the center stays attached.
